

Hegemony

Starting the Game

- Each player chooses a NAME for their country and picks TWO NATIONAL IDEAS
 - NATIONAL IDEAS
 - +2 Food income for every 5 Pops
 - Pops consume Gold instead of Food
 - +1 Building slot in all Cities
 - +2 Building slot in the Capital
 - Gain +2 Influence every Season
 - Maximum amount of Colonies increased by 1
 - Start with one additional Pop
 - Always gain an additional Pop when founding a City
 - Each Colony begins with 2 Slaves
 - Start with a Luxury Goods' Trader in your Capital.
 - Start the game with 20 Gold
 - Have one free right to Veto any Resolution, then discard this Idea.
- Each player places one CITY
- Each player places one COLONY

Setting Up the Board

Contents

- 37 Terrain Tiles
- 12 Coastal Tiles
- 100 Building tokens
- 120 Pop tokens
- 40 2x Pop tokens
- 100 Wood tokens

- 20 5x Wood tokens
- 100 Stone tokens
- 20 5x Stone tokens
- 100 Gold tokens
- 20 5x Gold tokens
- 1x4 Unrest Tables
- 2x4 Civilisation Tables
- 1 Politician Table
- 8x4 City Pieces
- 12x4 Colony Pieces
- 1x4 Capital Pieces
- 1 6-sided die
- 1 20-sided die

Distribution of the Pieces

- **Terrain Tiles** are randomly distributed to create a map. All **Terrain Tiles** provide a set amount of additional **Building Slots** and **Resources** (37 Tiles in total).
- **Resources** are required to do almost anything. **Wood** is primarily used for **Buildings**, **Stone** is primarily used for **City** upgrades and unique **Buildings**, **Gold** is used for upkeep and upgrading, and finally, **Food** is consumed by all **Pops** and arguably the most critical **Resource**.
- **Resources** on the **Terrain Tiles** are distributed in the following way:
 - Mountain (6)
 - +2 Building Slots, +6 Stone
 - +2 Building Slots, +4 Stone
 - +1 Building Slots, +4 Stone
 - +1 Building Slots, +2 Stone
 - +1 Building Slots, +2 Stone
 - +1 Building Slots, +2 Stone
 - Hill (9)
 - +3 Building Slots, +4 Stone
 - +3 Building Slots, +2 Food
 - +2 Building Slots, +1 Stone
 - +2 Building Slots, +1 Food
 - +1 Building Slots, +2 Stone
 - +1 Building Slots, +1 Food
 - Forest (14)
 - +2 Building Slots, +4 Wood (x2)
 - +2 Building Slots, +3 Wood
 - +1 Building Slots, +3 Wood (x3)
 - +1 Building Slots, +2 Wood (x5)
 - +1 Building Slots, +1 Food (x3)
 - Plains (8)
 - +4 Building Slots, +10 Food
 - +3 Building Slots, +8 Food
 - +3 Building Slots, +6 Food

- +2 Building Slots, +4 Food (x5)
- **Coastal Tiles** envelop the **Terrain Tiles** and make out the outer rim of the map (12 Tiles in total). Resources on them can be collected by building a **Port** in a **City**. Each **Coastal Tile** has at least one of the following:
 - A **Luxury Good**
 - A **Fishing tile** (provides **Food**)
 - Better market exchange rate (e.g. 1:4 instead of 1:6)
- All **Player Event Cards**, **Public Event Cards** and **Resolution Cards** are shuffled and put into their respective decks.
 - Every player automatically draws a **Player Event Card** in their turn. This card only affects the player.
 - A random player draws a **Public Event Card** every Season. This card affects **all** players.
 - If the **Win Condition “Events”** is disabled, then the **3 Special Event Cards** need to be removed from the deck before starting the game.
- All **Tables** are distributed to the players.
 - The **Budget Table** features sliders on several scales, helping the player track their income and expenditure of **Resources** and **Unrest**.
 - Includes separate net income sliders for Wood, Stone, Gold, Influence and Unrest.
 - Players still have to track their own Inventory by counting the blocks they have; sliders only track the income-per-turn.
 - The **Civilisation Table** allows you to track the **Buildings** and **Pops** your **Cities** have.
 - Players track these by placing blocks on the respective cells that help the quantity of **Pops** and the level of **Buildings**
 - Three blocks placed next to the **Forum** image on the table means a Level 3 **Forum**.
 - Six blocks placed next to the **Slave** image on the table means **6 Slaves**.
 - These cells exist separately for all **Cities** the player can build.
 - The **Politicians’ Table** features all of the **Politicians** and sliders to track their **Popularity**

Starting the Game

- A **Turn** is one player collecting resources, founding cities and buildings.
- A **Season** is when all players have played their **Turn** and a cycle is completed
 - If there are 4 players, a **Season** is the 5th, 9th, 13th... **Turn** in the game
- Players need to draft thrice: Once for placing their **Capital** (a **City**) on a **Terrain Tile**, once to place a **Colony** on a tile in a 1-tile radius, and finally to pick their **2 National Ideas**.

- Your **Capital** accommodates **twice** the amount of maximum **Pops**, collects **twice** the amount of **Resources** and has **+2** Building slots.
 - Other players cannot erect **Colonies** in the 1-tile radius of a player's **Capital**!
- **Colonies** can be put on any tile that has a friendly **Colony** or **City** in a 1-tile radius. At any given time, **two** players can share a **Terrain Tile** with a **Colony**, but their incomes are halved.
 - A **Colony** allows you to collect **Resources** on the tile, but can accommodate only 2 **Pops**.
 - **Colonies** can be upgraded to **Cities** for more capacity and production. This **immediately** removes the **Colony** of the other player if two players are sharing a **Colony**.
- **National Ideas** are unique modifiers that affect your nation for the entire duration of the game. Additional **National Ideas** can be chosen via **Resolutions**, **Event Cards** or unique **Buildings**. Some **National Ideas** include:
 -
- When the draft phase is complete, all players place their **Pops** inside their **Capitals** based on the **Terrain Tile** and **National Ideas** picked.
 - **Pops** enhance the **Resources** that **Cities** and **Colonies** produce every turn. They are the bulk of your civilization.
 - Your **Capital** starts with 4 **Pops** in total and can host an unlimited amount of Pops. **Colonies** start with 1 **Pop** but have a maximum of 4.
 - There are three types of **Pops** with different benefits and drawbacks.
 - **1 Pop = 1 Citizen = 2 Freeman = 4 Slaves**. Meaning that a card that adds “+1 Citizen” adds a Citizen, while “+1 Pop” means any kind of Pop can be added using the formula above. Players are free to distribute their starting **Pops** in any ratio they want.
 - **Citizen**: +1 Influence per Citizen, -2 Food per Citizen
 - **Freeman**: +2 Gold per Freeman, -1 Food per Freeman
 - **Slave**: +1 Resource per 2 Slaves, -1 Food per 2 Slaves, 1 Unrest per 8 Slaves

A Player's Turn

- The order of actions taken in a turn is the following:
 - ! If a **new Season** is beginning, a **Public Event Card** is drawn.
 - All players are affected by this card.
 - ! If **four Season** have passed, start a **Hegemony Assembly**.
 - All players are eligible to use their **Resolution Cards** to replace the automatically-drawn **Resolutions**.
 - The player with the turn collects **Resources**

- The player then draws a **Player Event Card** and executes its effects
- The player finally spends any available **Resource** on **Buildings**, drawing **Resolution Cards** and engage in trade with other players.

Mandatory Actions

- At the beginning of **every turn**, each player collects **Resources** and **Pops** based on their **Cities** (Capital, Cities and Colonies), **Buildings**, and **National Ideas, Events and Resolutions**.
- The player draws a **Player Event Card**, which can affect the player in a positive or a negative way.
 - Some cards come **immediately** into effect and are afterwards returned to the deck.
 - Some cards can be held in hand and played at the player's leisure, after which they are returned to the deck.
 - A limited amount of cards are **discarded** once they are played.

Spending Your Resources

- The player is free to complete many actions, provided they have a sufficient amount of **Resources**.
 - **Colonies** can be found in any tile that is **not adjacent** to another player's Capital. They can then be upgraded to **Cities**.
 - **Found a Colony:** 20 Wood, 2 Food
 - Building Slots: none
 - Pop Capacity: 2
 - **Upgrade to a City:** 30 Wood, 10 Stone, 5 Food
 - Building Slots: 2 + [Terrain Tile]
 - Pop Capacity: 10
 - Every **Pop** beyond this capacity adds +1 **Unrest**
 - **Buildings** can be built in cities to increase **Resource** income or gain special buffs.
 - **Marketplace:** Adds **1 Freeman** | Cost: 12 Wood
 - **Temple:** Adds **1 Citizen** | Cost: 6 Stone
 - **Workshops:** Adds **2 Slave** | Cost: 12 Wood
 - **Forum:** Adds +1 **Influence** for every 2 Citizens | Cost: 4 Stone, 8 Wood
 - **Granary:** Adds +2 **Food** | Cost: 12 Wood, 2 Stone
 - **Library:** Every 2 Libraries grant one **National Idea** | Cost: 20 Stone, 10 Wood | Upkeep: -2 Food every turn.
 - **Embassy:** Every level gives +1 **Assembly Vote** | Cost: 50 Stone, 50 Gold.
 - **Luxury Goods' Trader (max 3 in the game):** Obtains one of the **Luxury Goods** on land. | Cost: 100 Gold.

- In addition to the regular **Resources**, players can spend **Influence** in their turn to do the following:
 - Spend **5 Influence** to draw a **Resolution Card**. This card stays with the player until it is played.
 - Spend **10 Influence** to exchange their card with a random one from the deck.

Beginning of a Season

- A **Public Event Card** is drawn at the beginning of every **Season**, which is the beginning of a new player cycle. These can affect players in numerous ways. All **Public Event Cards** are exhausted immediately and discarded from the deck. Some examples include:
 - Guarantees a Draught/Bountiful Harvest for the duration of one season.
 - All players gain a number of Resources or Pop.
 - Unrest increased/decreased for a number of turns.
 - Increased/Decreased Building costs for a number of turns.
- Unless there is a **Hegemony Assembly**, the turn continues as normal. The player with the turn collects **Resources**, draws a **Player Event Card**, and completes other actions.

The Hegemony Assembly

- The **Hegemony Assembly** convenes at the start of **every fifth Season**, cannot be skipped, and happens before the beginning player with their turn takes any action.
- **Two Resolution Cards** are drawn to be voted or vetoed by all players. If any player chooses to play their own **Resolution Cards**, then it substitutes one of the cards.

Votes and Influence

- Each player begins the game with **one vote** that can be used for Yay'ing or Nay'ing resolutions. The number of votes be altered by the following:
 - Every 10 Citizens make **an additional vote**.
 - Some event cards **grant** or **remove a vote** for the specified amount of turns.
 - Constructing an **Embassy** permanently **grants one additional vote**
- **Resolutions** require a simple majority of player votes to pass. **Influence** allows you to make changes in various ways without directly being votes.
- Once a **Resolution** is **passed**, they are placed face-up in the centre of the board, counting as **Active Resolutions**.
 - If the player wants a **Resolution Card**, they can draw one in their turn using **5 Influence**.
 - If a player has a good **Resolution Card**, they can play it during a **Hegemony Assembly** by using **5 Influence**
 - If a player has a bad **Resolution Card**, they can exchange it by using **10 Influence**

- If a player wishes to repeal an **Active Resolution**, they can offer this to **vote** by replacing a drawn **Resolution Card** by using **10 Influence**.
- Finally, any **Resolution Card** can be vetoed by using **20 Influence**, regardless of any votes.

Politicians

- Each **Resolution** is represented by a **Politician**. It is these **Politicians** who draft the Resolutions and bring them to public attention every year. It is up to the players to promote or smear their agenda.
- As **Resolutions** belonging to **Politicians** are passed, the latter gain political power.
- politicanlardan resolution geçirdikçe power sliderları artacka mesela. active resolutions bölümünde x politikacıya ait 2 resolution varsa 1 level alıyo falan gibi düşün. her level aldığıında resolution'ı geçirtmiş oyuncuya bi buff gidiyo levle düşene kadar.
- There are four **Politicians** in the game:
 - **Stratokles Stratoklid “Cunning Populist”**: Targets specific players and deals substantial economic or social damage
 - **Demosthenes Archimenid “Agricultural Reformer”**: All-around Resolutions that mostly benefit all players.
 - **Perdiccas Tyrpanid “Urban Planner”**: Helps players with a City-building focus.
 - **Kleistophenes Hippaid “Rural Expansionist”**: Helps players with a Colony-building focus.
- Spesifik Stratokles Stratoklid'e bağlı win condition düşünüyorum hani her politican max 2 power levela gelecek ama SS'in 5 level'ı olacak Catan'daki Caballero gibi düşün. SS eğer 5 power level'a gelirse o anda hangi oyuncu kontrol ediyosa böyle son 5 tur falan tetiklenecek atıyorum o oyuncunun acccccccil triple gang'lenmesi falan lazım ona da counter bi mekanik düşünürüm. işte eğer ortak havuza X miktarda Resource verilirse o zaman neutralise edilecek ama her oyuncu contributelamalı falan gibi.
- Bunun dışında diğer adamları kontrol etmek buff sağlayacak. eğerl evel 2 Perdiccas Tyrpanid'i kotnrol ediyosan o zaman perma buff'ın var falan gibi. influence build yapıp o politikacıları rushlayabilirsin falan
 - influence build YİNE DE OP olmuyo bence çünkü düşün 4 citizenla oyuna başlarsan sadece tile'Daki resourceu alıyosun ama ratio'ya göre 16 slave ile bşalayabilirsin bu +8 resource every turn demek wtf aq

Maintaining Your Civilisation

Food and Unrest

- **Pops** require **Food** to survive. Unfed **Pops** will lead to **Unrest** and eventually to **Starvation**.
 - A food income of -2, -4, -6 Food respectively gives you 1, 2 and 3 Unrest every turn.

- Note that -2 Food income **during a turn** does not count, meaning if a player is able to manage the problem before their turn is up, no **Unrest** is applied.
- For every -2 Food income for **two** consecutive turns, the player has to **remove a Pop**. The choice of the **Pop** is dependant on the player (1 Citizen, or 2 Freeman, or 4 Slaves).
 - If a player has finished **two** turns in minus income, and **no other event** has granted them any Food income (or reduced the Food expenditure) during the other players' turns, **Pops** are **immediately** removed before any **Resources** are collected or **Event Cards** are drawn.
- If there are no active causes, **Unrest** drops by 1 every turn.
- **Unrest** can be deadly in the long term if it is mismanaged in the short term. All players will eventually gain some **Unrest** due to **Events** and **Pops**.
 - Having an **Unrest** of **5** removes 2 **Pops** from the player.
 - Having an **Unrest** of **10** removes 4 **Pops** from the player, and drops **Unrest** to 4.
- **Unrest** can also be increased by both **Player** and **Public Events** for a certain duration.

Luxury Goods

- All players have some access to **Luxury Goods** that help manage a nation's **Unrest**.
 - 6 **Luxury Goods** are distributed across the **Coastal Tiles**.
 - 3 **Luxury Goods** can be obtained on land by building a **Luxury Goods' Trader**.
- Every **Luxury Good** gives the player a **permanent -2 Unrest**.

Winning the Game

Conditional Ending

- This type of ending triggers if any of the conditions are met:
 - Political Victory: A player has **double** the amount of the sum of all other Assembly Votes in the game.
 - Economic Victory: A player

Hard Ending (after all Public Event Cards are exhausted)

- Some **Public Event Cards** are triggered **only after 5 Public Event Cards** are remaining in the game, otherwise they return to the deck. These are **Endgame** cards that, once drawn, end the game next turn.
 - Athena Promachos! King of Persia sends the Hegemony an ultimatum!

- Win Condition: Have the most amount of **Assembly Votes**
- Poseidon Hippios! A dire earthquake has struck!
 - Win Condition: Have the most amount of **Resources**
- Apollo Smithenus! Plague ravages the land!
 - Win Condition: Have the least amount of **Pops**

Event Cards

Here is a list of all **Public** and **Player Event Cards**

Seasonal Public Event Cards

<u>Card Description</u>	<u>Amount</u>
All players experience a Drought for one Season	6
All players experience a Bountiful Harvest for one Season	6
All players gain 2 Wood per 6 Pop (min 4 Wood)	3

All players gain 2 Stone per 6 Pop (min 4 Stone)	3
All players gain 2 Food per 6 Pop (min 4 Food)	3
All players have +2 Unrest per 10 Pop for one Season (min +2)	2
All players have -2 Unrest per 10 Pop for one Season (min -2)	2
All building costs (excl. founding a City or Colony) doubled for one Season	2
All building costs (excl. founding a City or Colony) halved for one Season	2
Flash floods! Every player removes 1 Building from each City	1

Player Event Cards

<u>Card Description</u>	<u>Amount</u>
Gain 1 Citizen	6
Gain 1 Freeman	6
Gain 2 Slaves	3
Gain 2 Food	3

Gain 4 Wood	3
Gain 4 Gold	2
Gain 4 Stone	2
Gain 2 Unrest	2
Lose 2 Unrest	2

•

Resolutions

- All **Resolution Cards** are shuffled into a **single deck**.

Stratokles Stratoklid, Cunning Populist

- Decrease Player Colony Limit by 1
- Remove Player Colony from the Map
- Give Player 2 Unrest for a Turn
- Deny Luxury Good
- Deny One Player City Food Income for a Turn
- Impose Partial Trade Sanctions (viz. Players)
- Impose Full Trade Sanctions (viz. Bank)

Demosthenes Archimenid, Agricultural Reformer

- Increase Global Wood Income
- Increase Global Stone Income
- Increase Global Food Income

- **Guarantees a Good Harvest but Global -4 Food**

Perdiccas Tyrpanid, Urban Planner

- **Reduce Building Resource Cost**
- **Reduce Citizen Upkeep, Increase Slave Upkeep**
- **Increase Building Slots, Decrease Colony Limit**
- **Quarantine a Colony for a Duration**

Kleistophenes Hippaid, Rural Expansionist

- **Reduce Slave Upkeep, Increase Citizen Upkeep**
- **Increase Colony Limit, Decrease Building Slots**
- **Increase Colony Pop Limit**
- **Blockade Player Port**
